MHDS-CL Mobile High-Density Storage

Mobile High-Density Storage System

Casework High-Density Performance. Rivet High-Density Value.

Finally, a fully modular, mobile, and configurable high-density system that provides the function of high-end casework at the price point you would expect with a rivet system.

The unique blend of value and performance can only be found with Capsa's NEW modular MHDS-CL High-Density Storage System.

- Optimizes storage capacity by eliminating aisle space
- Open-Front cantilever design permits uninhibited vertical and horizontal storage
- Maximum design flexibility from single-bay 3' carriage to triple-bay 12' carriage
- Common sense, rugged design provides DIY installation simplicity
- Fully-adjustable modular storage components allows precise function and storage design
- Storage components and configuration can be changed as requirements change
- Surface-mount V-Track rail system provides low-profile clearance, InTrack™ anti-tip system, and is ADA compliant

More flexibility. Lower cost.

The integrated cantilever brackets and UniFrame™ backbone system provide maximum versatility for up to 12' of stable carriage area. The system can be designed in any combination of 3' and 4' bay widths to ensure a perfect fit for your high-density storage requirements. Best of all, simple set-up and a reduction in necessary track greatly reduces installation cost and complexity.

Maximum Configurability

Mix & Match Flexibility

The NEW Capsa MHDS-CL High-Density Storage System provides the benefit of a truly customized configuration that meets the precise application and requirements of the storage environment.

- Secure horizontal cabinet storage is perfect for archive document storage, judicial casework files, law enforcement records, and healthcare patient files.
- Storing tall items is simple with the vertical storage bars that are perfect for retail environments, light industrial, professional trades, and distribution centers.
- An array of shelving types permit mix-and-match flexibility within the same carriage, or even within the same bay
- Odd-sized or irregular items can be easily accommodated in the convenient basket system
- Incorporate the patented IRSG Hanger Management System to ensure efficient workflow and an organized retail apparel business.
- Incorporate employee locker modules to free-up valuable wall space in the back-room of any business.

Mobile High-Density Storage Modules

Modular Component System

The NEW Capsa Solutions Mobile High-Density System can be configured with modular components that permit you to maximize storage and optimize wall space. These accessory units provide your business the flexibility to change and rearrange modules quickly and easily, without the need for tools.

The unique storage capabilities of this new high-density storage system permit superior pass-through, gravity, secure, and vertical storage in a rugged design. Your choice of shelving styles including wire grid, laminated, metal, and hang bar give you the precise storage function to meet your unique storage requirements.

Lockers & Enclosed Storage

Improve space efficiency by incorporating employee lockers and secure storage into your system.

Wire Baskets

Hard-to-handle and odd-shaped items are easily stored in wire baskets.

Drop Leaf Table Top

Increase your processing space without increasing your footprint.

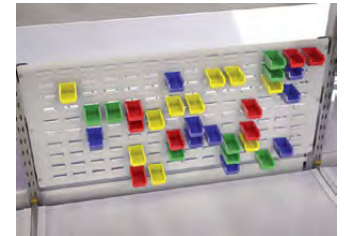

Hanger Storage

Save wall space by integrating IRSG patented hangar bars into your system.

Vertical Storage

Easily organize tall items that require extended vertical space

Slot Wall w/Bins

Your choice of multiple bin sizes permits the perfect storage area for small items

Shelving Types

Wire Grid Shelf

Laminated Particle Board

Metal Shelf

Gravity Shelf

Ideal for a Multitude of Storage Applications

Business archive storage

College and High School athletics, drama, and music departments

Military and law enforcement

Museum artifact storage and document archiving

Retail back-room apparel, sporting goods, hardware and mixed-merchandise

Warehouse packaging and small parts

Government records and judicial case files

Industrial tool cribs and parts organization

MHDS-CL Specifications

- Height:** Vertical storage space of 96"
- Width:** From 3' to 12'
- Depth:** 18" back-to-back or 36" pass-through
- Weight**
- Capacity:** 600 pounds per lineal foot; 400 pounds per shelf
- Adjustability:** Patented cantilever supports are vertically adjustable in 1" increments
- Composite:** Rugged tubular steel frame, powder coated steel, and anodized aluminum components

Configuration Flexibility

Complete Modular Storage

The unique attributes of the Capsa MHDS-CL give you an enhanced level of flexibility not commonly found in mobile-aisle storage systems. From pass-through shelving, to segmented vertical storage, to cabinet and locker modules, this system offers complete configurability to maximize your available storage space.
